

Teacher Institute

For ALL Grade 3-6 Teachers

- Workshops with “tried and true” strategies**
- A step-by-step handout**
- Theory into Practice overview**

We are holding a teacher institute to share the results of the VINE project with other teachers. For the past three years we have worked together and have developed numerous strategies and ideas that work to “up the ante” for vocabulary learning, resulting in greater growth on vocabulary tests and an excitement and enthusiasm about words rarely seen, especially with English learners. Please join us in this opportunity to learn about creating word conscious classrooms presented by local teachers and the VINE project.
